# STEM FESTIVAL

4-7PM | April 17, 2024 | North Iowa Area Community College Gym

The goals of the *STEM Festival* are to promote, inspire and engage youth in Science, Technology, Engineering and Mathematics activities and to introduce children and parents to STEM careers.

Experience hands-on STEM activities provided by local businesses and organizations:

- Learn about the science of fermentation while making pizza dough
- Measure ingredients to make smoothies with a bike blender
- Test out a 3D Scanner and Printer
- Encounter live animals and learn about environmental education
- Design your perfect bedroom or house
- Spark your curiosity through an electrifying exploration of electric circuits!
- Handle fiber optics and learn about fusion
- Identify architectural elements and build with blocks
- And more!

Join us for a night of fun, interactive, hands-on learning  
for kindergarten-6th grade students!
